MS in Computer Science Degree Program

Program Requirements

The M.S. in Computer Science is a 31 credit-hour program with an optional thesis track. Eleven distinct courses must be taken to fulfill the Master's Degree. Any course taken that belongs in multiple categories cannot double count. Up to two courses may be taken from other, appropriate graduate programs subject to advisor approval, provided all requirements for this MS degree are fulfilled.

Any core course can be taken as an elective.

Students can choose a **maximum** of 6 credits of **approved** graduate electives from graduate programs in the field of Electrical and Computer Engineering, Mathematics, Management Information Systems, Data Analytics, or Bioinformatics. Only 3 credits from the graduate program in Management Information Systems could be counted towards electives for a graduate degree in Computer Science.

Any graduate course taken outside of Rowan-CS must be **approved** prior to registration by the CS Graduate Program Committee. Such an approval is on an individual basis. The interested student must submit in writing to the CS Graduate Program Coordinator an explanation as to why they are interested in the course and how the course addresses one or more of the goals of the MS in Computer Science program. The student can expect a response from the Graduate Committee within 10 business days.

The MS in Computer Science Program Goals

- **Program Goal 1:** MS Computer Science graduates understand core areas of Computer Science and apply this knowledge to solving computing problems.
- **Program Goal 2:** MS Computer Science graduates are able to design, analyze, implement and evaluate computer systems and applications.
- **Program Goal 3:** MS Computer Science graduates communicate effectively.
- **Program Goal 4:** MS Computer Science graduates are prepared to engage in continuing professional development and research.

Project Intensive Designation

The course instructor may choose to designate a course as “Project Intensive.” Project intensive courses contain a significant project component that contributes to the students’ final grade. Students choosing the non-thesis option must take at least two project intensive courses. The current list can be found at [Project Intensive Courses](#).

Graduate Course Offering

The graduate course offerings can be found at [Section Tally](#) by choosing the appropriate semester, as department “CSCI- Computer Science” and as attribute “GRAD – Graduate Lvl crses 500 and up”. Students can only register for courses that are offered on the Main and Camden campuses. The Camden campus is easily accessible from the main campus by free Rowan University shuttle. The catalog description of the courses offered can be found by clicking on the course CRN. Students cannot register for courses offered as part of our extension programs.

Ensuring Academic Success

The success of our graduate students is essential to the Computer Science Department and to Rowan University. Therefore, in order to ensure progress towards graduation and academic success, it is important for CADP in CS students to stay in regular contact with the Graduate

Program Coordinator and to get advice on courses, to check academic progress as well as communicate any concerns, questions or general student issues. Do not hesitate to contact Dr. Xu at xu@rowan.edu.

It is the students’ responsibility to make sure that they have the necessary background for every course they take. In order to ensure that, the students are encouraged to contact the instructor of the course to enquire about the expected necessary background. If a student is lacking the necessary background for a course, it is the student’s responsibility to supplement with self-study in preparation for the course.

Thesis Requirements

Rowan students pursuing a *thesis-track* MS in Computer Science degree have to write and defend a thesis. In addition, as part of their fulfillment for graduation, are required to submit their thesis to the Office of Graduate Research Services for final format approval. The Office of Graduate Research Services coordinates the final format review process and is responsible for ensuring that all theses adhere to the format and style as prescribed in the [Thesis & Dissertation Manual](#) prior to final approval with the Registrar for graduation purposes.

For information regarding thesis final format review please see: <https://rowanu.com/thesis>.
