INSTRUCTIONS

Obtaining a Mantoux/Tuberculous (TB) Test:

To obtain a TB test, please schedule an appointment to have your test completed by a health care provider or the Wellness Center on Campus. Placement districts generally require the test result to be dated within 6 months of the field placement start date.

- You may contact the Wellness Center on Campus. The cost of the TB test is $10. Please contact them at 856-256-4333 to schedule your appointment.
- The test is administered and you must go back to the doctors to have the results read within a 48-72 hour window. If you miss the 48-72 hour window, you will need to have a new test administered.
- Obtain a copy of the result from the health care provider. The result must have the date administered, the date the test was read, and the test result.
- Upload a copy of the TB test result into TK20.
- Enter the date of the test result in TK20.

Exempt from a Mantoux/Tuberculous (TB) Test:

If you are exempt from having a TB test due to individual circumstances, you are still required to show that you do not have an active TB infection. Please upload a copy of your most recent test result. If you have not had a test completed since enrolling at Rowan University, it is recommended you consult with your physician to determine the test best suited for you and obtain an updated test.

- Upload your most recent result or obtain a copy of the result from your health care provider. The result must have the date administered and the test result.
- Upload a copy of the TB clearance result into TK20.
- Enter the date of the test result in TK20.
